

Are You Concerned About Water Quality of the Loyalhanna and Other Water Streams in Latrobe?

**If So, Here Are Some Things
That You Can Do!**

- **Don't discard leaves and grass clippings onto the street, into the storm drains or stream channels**
- **Do not cut grass on your lawn to less than three inches in height. Longer grass is healthier and requires less fertilizer as well as less watering.**
- **Clean up after your pet. Don't let pet waste get washed down the storm drain.**
- **Properly dispose of used motor oil, oil based paints, solvents, household cleaners and other hazardous household chemical**

Go to www.pacleanways.org for more information.

**Together, We Can Make A
Difference**
